

Rosy starling
Pastor roseus

Large grey babbler
Argya malcolmi

Black-breasted weaver
Ploceus benghalensis

Laughing dove
Spilopelia senegalensis

Spotted owl
Athene brama

House sparrow
Passer domesticus

Shikra
Accipiter badius

Blue-tailed bee-eater
Merops philippinus

Yellow-eyed babbler
Chrysomma sinense

Small minivet
Pericrocotus cinnamomeus

Red-rumped swallow
Cecropis daurica

Brahminy starling
Sturnia pagodarum

Western koel
Eudynamys scolopaceus

Rose-ringed parakeet
Alexandrinus krameri

Black kite
Milvus migrans

Rufous treepie
Dendrocitta vagabunda

Red-vented bulbul
Pycnonotus cafer

Chestnut-shouldered bush-sparrow
Gymnoris xanthocollis

Yellow-footed green-pigeon
Treron phoenicopterus

Jungle Babbler
Argya striata

Black-rumped flameback
Dinopium benghalense

Indian roller
Coracias benghalensis

Eurasian collared-dove
Streptopelia decaocto

Asian green bee-eater
Merops orientalis

Indian grey hornbill
Ocyrocus birostris

Black drongo
Dicrurus macrocercus

Black-Shouldered kite
Elanus axillaris

Ashy prinia
Prinia socialis

Indian silverbill
Euodice malabarica

Plain prinia
Prinia inornata

Birds of IITGN

Little cormorant
Microcarbo niger

Lesser whistling-duck
Dendrocygna javanica

Indian peafowl
Pavo cristatus

Eurasian thick-knee
Burhinus oedicanus

Greater coucal
Centropus sinensis

Common hoopoe
Upupa epops

Acridotheres tristis

Red-wattled lapwing
Vanellus indicus

Red-naped ibis
Pseudibis papillosa

Indian pond-heron
Ardeola grayii

Common moorhen
Gallinula chloropus

Little grebe
Tachybaptus ruficollis

Indian robin
Saxicola leucurus

Wood sandpiper
Tringa glareola

Cattle egret
Bubulcus ibis

Black-winged stilt
Himantopus himantopus

White-spotted fantail
Rhipidura albogularis

Oriental magpie-robin
Copsychus saularis

White-breasted waterhen
Amaurornis phoenicurus

Yellow-wattled lapwing
Vanellus malabaricus

A golden beam of sun piercing through the windows along with gleeful early morning chirruping of a hundred varieties of birds is how a morning begins in the lush green campus of IIT-Gandhinagar. The vast green campus is a heaven for bird lovers. It is home to a variety of birds and mammals and plays host to many migratory birds in winter. Abode to nearly 100 species of birds, including those that migrate from other countries, our campus has various intersecting landscapes. Nothing relieves the stress of everyday life than being with nature and with all its diversity. We, residents of IIT-Gandhinagar, are lucky to share our home with a wide variety of birds.
